for Registrar General, India.

NATIONAL
SAVINGS
CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the year ending the 4th November, 1950

REMARKS

The figures of births and deaths shown in this statement for the week ending the 4th November, 1950 relate to 123 towns with an estimated population of 13,930 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 54% of the total number of towns representing 49% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 12,538 and 5,608 representing birth and death rates of 46.8 and 20.9 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 102 towns with an estimated population of 11,369 thousands. Information about Assam, Bihar, Bombay, Madhya Pradesh and West Bengal could not be included. The total number of towns is 201 and their population is 24,688 thousands. Thus 51% of the total number of towns representing 48% of the total population is covered. The numbers of births and deaths recorded in these towns were 10,749 and 4,800

representing birth and death rates of 49.2 and 22.7 thousand of population respectively. The table at the end of this statement gives the position by states.

Tiruvannamalai in Madras was the only town had a high death rate of 54.7 per thousand of population and this high death rate was not due to any one of the specified causes.

(B) States (Part B).—The data here relate to towns with an estimated population of 2,561 thousands. The total number of towns is 32 and their population is 11,369 thousands. Thus 75% of the total number of towns representing 68% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,789 and 808 representing birth and death rates of 36.3 and 16.4 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
